

Hearing an alternative alignment of the NLR proposed by the Bellyeoman Community Council was considered and dismissed by the Scottish Government Reporter. I am aware of Townhill Community Council's (through Ronnie Cowan) concerns about the alignment of the NLR being too close to Townhill. I am also aware of Wellwood CC's concerns about the indicative alignment of the NLR being on top of a popular core path. All these concerns have been noted in the Design Briefs for the two sections of the NLR that FC will deliver. The NLR will not be located on the core path between Wellwood and Townhill – it will be located through the middle of the allocated Wellwood North and Colton sites by the respective developers. The NLR will follow the alignment of the existing Townhill access road with its junction with Townhill Road more or less in the location of the existing junction.
